

The Perfect Linear Motion Products for Your Precise Application

SCHNEEBERGER's linear technologies put your products in the perfect position.

Our Swiss engineering creates high-quality components that achieve breakthroughs in accuracy, product longevity, and reliability. Our customization expertise eliminates compromises that add cost and limit functionality — to help your engineers fulfill their design vision.

SCHNEEBERGER is the linear motion supplier of choice for original equipment manufacturers (OEMs) that demand the greatest machine precision matched with low cost of ownership.

3-D PRINTING

For additive manufacturing applications such as 3-D printing, SCHNEEBERGER's high-quality linear motion components and flexible, customized solutions deliver all the speed, accuracy, and rigidity that OEMs need.

Key products: MONORAIL profiled guideways with balls / MINIRAIL profiled miniature guideways / Hipp miniature ball screws / Linear motion systems

MEDICAL / LIFE SCIENCES

From laboratory automation and micro-automation to biotechnology and nanotechnology, SCHNEEBERGER brings medical / life sciences OEMs benefits such as high rigidity, maximum precision and positioning accuracy, smooth movement, very low displacement forces, and corrosion resistance.

Key products: MONORAIL ball profiled linear guideways / MINIRAIL profiled miniature guideways / Hipp miniature ball screws / Sferax ball bearings / Linear motion systems

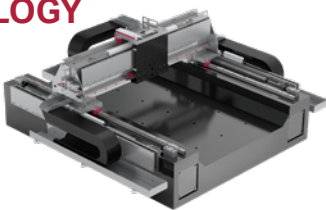

MACHINE TOOLS

Linear motion products for machine tools demand exactly the benefits that SCHNEEBERGER can offer: including high rigidity and excellent running characteristics plus ergonomics and functionality for operator ease, efficiency, and safety.

Key products: MONORAIL profiled guideways with rollers / MONORAIL profiled guideways with balls / MONORAIL AMS integrated distance measuring systems / A. Mannesmann large-diameter ball screws / Gear racks

METROLOGY

Test and measurement equipment manufacturers turn to SCHNEEBERGER for high-quality, high-precision products that deliver accuracy, stiffness, and smoothness of travel — while reducing assembly times to cut costs.

Key products: Linear motion systems / MINIRAIL profiled miniature guideways / Ball screws / Linear guideway components

AUTOMATION

SCHNEEBERGER contributes the utmost in linear motion precision and value to OEMs' automation applications from robotics to packaging, printing, and injection molding.

Key products: MONORAIL profiled guideways with rollers / MONORAIL profiled guideways with balls / Miniature and large-diameter ball screws / Sferax ball bearings / Linear motion systems / MINIRAIL profiled miniature guideways / MONORAIL AMS integrated distance measuring systems

For the precise, reliable, cost-effective linear motion solution that will put your product in the perfect position, contact your SCHNEEBERGER representative today!
