PRESS RELEASE

SCHNEEBERGER Opens Plant 3 in Roggwil

A New Production Facility for Precision and Innovation

SCHNEEBERGER AG Lineartechnik celebrated the official opening of its new Plant 3 in Roggwil, Switzerland on May 5, 2025. With the modern production, assembly and office building of around 6000 square meters, the company underlines its long-term commitment to the location and at the same time sets new standards in the production of high-precision positioning systems.

A special highlight of the new building is an ISO Class 6 clean room, where SCHNEEBERGER manufactures customized positioning and motion systems to the highest standards of cleanliness and quality. "We want to remain a technological leader in the future, and the design and infrastructure of the new Plant 3 will support us in this endeavor," explains Michael Dvorak, Managing Director of SCHNEEBERGER AG. The new location is quietly situated behind Plant 2, well away from traffic-related vibrations, enabling the most precise measuring and production processes.

Expanding Capacity and Advancing Innovation

The construction of the new plant brings many benefits to SCHNEEBERGER: in addition to expanded production capacity and optimized workflows, it also provides modern office space, with room for creativity and an enhanced working environment.

With over 100 years of history, the SCHNEEBERGER Group has become one of the world's leading manufacturers of linear and profiled rail guides, as well as linear motion measurement systems. "Plant 3 is our commitment to the region - and to the continuous development of our expertise," says Michael Dvorak.

The ground-breaking ceremony was held in September 2023, and construction proceeded according to plan. The staggered relocation of the Systems Division from Plant 1 began in January 2025, with full operations set to commence in the new facility in May.

The SCHNEEBERGER Group

SCHNEEBERGER® supplies renowned original equipment manufacturers (OEMs) worldwide in a wide range of industries, from machine tools to the solar, semiconductor and electrical industries, medical technology, handling, and robotics, among others. The SCHNEEBERGER Group employs 1,400 people at 14 production sites around the world. More than 4,000 customers rely on the precision, innovation and reliability of SCHNEEBERGER products and services. 100 sales engineers and sales partners take care of individual customer needs and ensure consultation and customer proximity. Linear bearings, profiled linear guideways, measuring systems, gear racks, slides, positioning systems, ball screws and mineral casting are all part of the product and manufacturing range.

In 2023, the SCHNEEBERGER Group was celebrating the 100th anniversary of its company history. The company achieved this historic milestone through continuous further development and thanks to the know-how of all its employees.
